

Joint Maritime Information Center

Update 079 to JMIC Advisory Note:

01 March – 02 August 2026

Regional Tension - Impact on Maritime Security

Area of Concern:

Middle East Maritime Region

JMIC# 001-26

Regional Threat Level: SEVERE

1. Confirmed Maritime Security Incidents List since last report

Date	Vessel	Vessel Type	Event Type	Location	Narrative
1 August 2026, UKMTO 101-26	Name withheld UFN	LNG Carrier	Attack	Strait of Hormuz, in Omani TTW, 11NM north east from the coast of Lima. The vessel was transiting eastbound.	An LNG tanker was struck by an unknown projectile at 2330 UTC on the July 31 st while transiting outbound through the SoH. All crew were reported safe. The projectile struck the port side engine room, causing a fire which was extinguished. The vessel lost propulsion. Omani Coast Guard provided assistance. No environmental impact reported.
1 August 2026, UKMTO 102-26	Name withheld UFN	Tanker	Attack	Strait of Hormuz, in Omani TTW, 21NM northeast from the coast of Khasab. The vessel was transiting westbound.	A VLCC reported that at 2206 UTC July 31 st the crew witnessed an unidentified projectile land in the water 5 meters from the vessel, on its starboard quarter. The crew stated they heard an explosion and could see flames on the water. The crew were reported safe. The vessel was not struck.

2. Operational Summary – Last 72 Hours

2A. Arabian Gulf (no change)

Traffic flows remained stable, with anchorage congestion unchanged across the region.

Navigational system interference and wider regional military activity continued to warrant caution, and recurring GNSS interference remained consistent with prior reporting; no new kinetic events have been reported in this period.

2B. Strait of Hormuz

Commercial traffic through the Strait of Hormuz remained at reduced levels. Independent tracking data indicated suppression with single-digit numbers of tankers in both directions.

Traffic patterns continued to reflect a cautious operator posture following earlier attacks, and several companies delayed or rescheduled passages. A notable portion of vessels transited with AIS-off, further reducing visible density and complicating situational awareness.

IRGC harassment activity persisted, including hailing, UAS overflight, and targeted surveillance of merchant shipping. These actions continue to demonstrate Iran's intent to assert presence along key transit lanes and maintain pressure on transiting vessels.

There remained a continued risk of drifting or uncharted mines in and near the TSS, with mine danger areas still active.

2C. Gulf of Oman

Traffic flows in the Gulf of Oman remained stable, with vessels maintaining heightened awareness amid ongoing naval activity.

Naval presence remained elevated due to blockade enforcement activity. CENTCOM stated that, as of July 31st, 30 commercial vessels had been redirected, two disabled, and two boarded for compliance verification. Previous kinetic enforcement of the Iranian-port blockade signifies a US commitment to blockade operations.

Vessels were expected to respond promptly to military queries and maintain AIS-on unless constrained by security threats. Operators continued to exercise caution due to regional strike activity, and ongoing IRGC monitoring of shipping in adjacent waters.

2D. Arabian Sea (No change)

The northern Arabian Sea remained calm with no confirmed maritime security incidents in this period. Naval forces continued routine patrols, and commercial traffic was transiting without disruption. The broader operating environment remained influenced by regional tensions.

2E. Gulf of Aden (No change)

Commercial traffic remained steady in the Gulf of Aden.

Threats associated with historical skiff activity and piracy-related approaches persisted, but no incidents were reported during the period. Operator caution remained elevated due to recent regional activity, though vessel movements continued without disruption.

Vessels were advised to maintain BMP-compliant watchkeeping throughout the IRTC.

2F. Southern Red Sea & Bab el Mandeb

Commercial traffic continued to transit steadily through the Southern Red Sea and Bab el Mandeb; however, the security posture shifted following previous confirmed Houthi attack on a Saudi-flagged tanker. The incident demonstrates a renewed willingness and capability by Houthi forces to target specified merchant shipping.

Houthi forces have reiterated claims that the Bab el Mandeb is closed to Saudi-affiliated vessels, and recent messaging continues to emphasize hostile intent toward vessels perceived as linked to Saudi interests.

The Houthi-controlled Humanitarian Operations Coordination Center (HOCC) in Sana'a issued an official clarification reaffirming that passage through the Bab el-Mandeb Strait remains free of charge for non-Saudi and non-coalition vessels. The HOCC rejected reports of planned transit tolls, characterizing their routing clearance as a voluntary coordination service and warning commercial operators against unauthorized third-party fee solicitations.

Saudi Arabia is standing up a 43-nation defensive maritime coalition in response to Houthi threats against Saudi-linked shipping. The coalition will focus on freedom of navigation, energy security, joint patrols, threat monitoring, and intelligence sharing across the Red Sea, Bab el-Mandeb, and Gulf of Aden. Initial effects are likely to focus on shared maritime domain awareness before full patrol interoperability.

Open-source data tracking Bab el Mandeb transits with AIS-on declined (recent daily averages in the 20–40 range with day-to-day fluctuation). Coalition naval units are present in the area.

2G. Somali Coast and Somali Basin (No change)

No piracy incidents were reported in this period. Three merchant vessels remain held:

- Oil/products tanker – held since 21 April 2026
- General cargo / cement carrier – held since 26 April 2026
- Oil tanker – held since 02 May 2026; taken 10 NM off the Yemen coast and diverted toward Somali waters; status unconfirmed.

2H. Northern Red Sea & Suez Canal (No change)

No confirmed attacks or disruptions **were reported in this period**. Suez Canal transits continue normally. Reports of elevated GNSS interference persist in the vicinity of Yanbu, though without operational impact on traffic flow.

2I. Eastern Mediterranean

No confirmed maritime attacks have been reported in this period; however, previous events listed below in the Confirmed Maritime Security Incidents List remain under investigation. Periodic electronic and navigational interference continued near Cyprus and the Levant. Naval presence remained, and vessels were advised to maintain prudent separation from military units.

3. Regional Threat overview

JMIC Threat Scale: ● Low | ● Moderate | ● Substantial | ● Severe | ● Critical

Region	Threat Level	Notes
Arabian Gulf	MODERATE	Navigation interference and residual kinetic risk persist; an attack is possible but not likely under current conditions.
Strait of Hormuz	SEVERE	Recent Iranian attacks, the threat level at SEVERE, with deliberate hostile action assessed as highly likely under current conditions. Navigation interference persists, and mine-risk reporting remains relevant within and adjacent to the TSS. The threat environment remains heightened and warrants increased vigilance. IRGC attacks, hailing, and routing pressure continue, particularly for AIS-on vessels.
Gulf of Oman	SUBSTANTIAL	Residual strike-linked risk keeps the threat level at SUBSTANTIAL, and an attack is a strong possibility under current conditions. Naval presence remains visible, with ongoing monitoring, hailing, and verification queries, particularly near approaches to the Strait of Hormuz. Enforcement activity poses no direct impact to neutral shipping transits in the Gulf of Oman. Electronic interference continues to present a credible concern for operators.
Arabian Sea	MODERATE	Residual conflict-linked risk persists, but no attacks have been reported, and current indicators suggest no imminent change to the threat environment.
Gulf of Aden	SUBSTANTIAL	Piracy-related events keep the threat level as SUBSTANTIAL, with PAG activity a strong possibility in coastal approaches, transit corridors, and established small-craft areas. Southwest monsoon conditions limit offshore skiff operations, but coastal and sheltered zones remain conducive to opportunistic movement. Vessels should maintain heightened vigilance, uphold BMP-compliant posture, and report suspicious activity to UKMTO.
Bab el-Mandeb / Southern Red Sea	SUBSTANTIAL	The threat level has been raised to SUBSTANTIAL following the suspected Houthi attack on a Saudi-flagged tanker in the Southern Red Sea. The strike demonstrates active targeting capability and a clear willingness to engage merchant shipping. Houthi messaging continues to assert that the Bab el Mandeb is closed to Saudi-affiliated vessels, reinforcing hostile intent toward vessels perceived as linked to Saudi interests. Forward-deployed missile and drone systems near Bab el Mandeb remain in place, and regional reporting indicates the group has been instructed to remain prepared to disrupt the Red Sea oil route should broader escalation occur. Based on the recent attack, sustained intent, and maintained capability, additional attacks are assessed as strong possibility.
Somali Coast / Somali Basin	MODERATE	PAG activity remains possible; monsoon conditions restrict offshore skiffs but coastal opportunism persists.
Northern Red Sea / Suez Canal	MODERATE	No attacks or disruptions reported. Suez Canal operations remain normal. Periodic EMI/GNSS interference remains possible.
Eastern Mediterranean	LOW	Localized EMI/GNSS disruptions persist, and regional naval presence remains steady. No maritime attacks or hostile approaches have been reported, and the threat to commercial shipping is assessed as unlikely; however, local authorities are conducting an investigation with respect to UKMTO advisories 099-26 and 100-26.

JMIC Regional Threat Levels

Threat Level	Definition
Low	An attack is highly unlikely
Moderate	An attack is possible but not likely
Substantial	An attack is a strong possibility
Severe	An attack is highly likely
Critical	An attack is almost certain

4. Maritime Incidents & Traffic Assessment

4A. Confirmed Vessel Incidents (Since 1 March)

Total of 78 incidents since 1 March; two incidents since the last report.

4B. Infrastructure Incidents (Last 72 Hours) (No change)

No attacks on ports or maritime infrastructure reported.

The overall risk remains MODERATE, driven by the potential for renewed kinetic activity and ongoing uncertainty along Iranian coastal areas. Recent UAS activity continues, and while regional strikes have occurred outside the maritime domain, no indications of targeting port or maritime infrastructure have been confirmed.

4C. Traffic Trends

- Strait of Hormuz:
 - Historical average: ~138 vessels/day (2025 baseline)
 - U.S. – facilitated SoH transits 31 July - 01 August (past 72 hours): 40

** Metrics are drawn from two separate sources: U.S. NCAGS data reflecting U.S.-facilitated Strait of Hormuz transits only, and S&P Maritime/SeaVision data reflecting non-facilitated vessel traffic for cargo carrying vessels above 1,000 deadweight tons, excluding vessels calling Iranian ports adjacent to the Strait of Hormuz.*

- Bab el-Mandeb:
 - Historical average: ~61 vessels/day (2023 baseline)
 - Vessel transits in past 30 July – 01 August (past 72 hours): 93

** Metrics are drawn from S&P Maritime for cargo carrying vessels above 1,000 deadweight tons.*

4D. Port & Anchorage Congestion (No change)

High vessel density persists across major Arabian Gulf anchorages, with overall congestion remaining stable following an earlier outbound surge. Over the last 72 hours, Strait of Hormuz traffic continued at reduced levels. Flows remain below pre-conflict levels, with the previously observed moderate decline now stable.

Periodic repositioning within anchorages remains advisable to avoid long-term predictability and to maintain safe separation in congested areas.

4E. GNSS / AIS Interference

GNSS interference remains consistent across the Strait of Hormuz approaches, the Gulf of Oman, the Arabian Gulf. The residual GNSS/EMI hazard across the Red Sea corridor continues. Elevated

electronic interference persists in the vicinity of Yanbu. Intensity remains as lower and more intermittent than concurrent activity in the Strait of Hormuz and the Arabian Gulf. No reports of a new, continuous, or high-intensity electronic interference event producing navigational disruption in the reporting period.

5. Outlook (24–48 Hours)

5A. Arabian Gulf (No change)

The operating environment is assessed as moderate, with continued navigational system interference and residual kinetic risk. An attack is possible but not likely under current conditions. Rapid, short-notice actions near Iranian coastal waters and anchorages remain possible.

Vessels stationary for extended periods, or maintaining AIS-on while static, may still face elevated targeting risk.

5B. Strait of Hormuz (No change)

Maritime traffic through the Strait of Hormuz is expected to remain at reduced levels across both the northern Iranian-controlled route and the southern Omani corridor. However, a recently announced cancellation of strikes on Iran and the potential for a negotiated settlement may provide an opportunity for un-harassed transits. Operator caution should continue, driven by a series of vessel attacks, ongoing U.S. blockade enforcement, and elevated regional tension.

The U.S. blockade of Iranian ports continues to be enforced. Unauthorized entry or departure may result in interception or force. Neutral transit is permitted, but vessels should expect visit-and-search checks, strong U.S. naval presence, persistent IRGC monitoring, and increased VHF hails. A 30 NM standoff from U.S. units is advised to reduce misidentification risk.

A vetted humanitarian-cargo exemption remains in place, requiring submission to NAVCENT NCAGS. Approved vessels may transit to Iranian ports but remain subject to inspection and may not load cargo in Iran beyond fuel and stores.

The regional threat level is assessed as SEVERE, with deliberate hostile action considered highly likely under current conditions. Vessels transiting with AIS-on can expect to receive directed hails instructing them to divert toward the northern Iranian-controlled route.

Navigation interference persists, and mine-risk reporting remains relevant within and adjacent to the TSS. Clearance and mine-surveying operations continue throughout the Strait of Hormuz, with updated coordinates and graphics available from NAVCENT NCAGS (m-ba-navcent-ncags@us.navy.mil). Vessels should remain vigilant and maintain heightened situational awareness during all approaches.

5C. Gulf of Oman (No change)

The threat level remains SUBSTANTIAL, driven by residual strike-linked risk, and an attack is a strong possibility under current conditions. Naval presence remains elevated, with continued monitoring, hailing, and verification queries, particularly near approaches to the Strait of Hormuz.

The U.S. blockade continues to be enforced. Unauthorized entry or departure may result in interception or force. Neutral transit is permitted, but vessels should expect visit-and-search checks, strong U.S. naval presence, persistent IRGC monitoring, and increased VHF hails. A 30 NM standoff from U.S. units is advised, as well as ensuring continuous monitoring of VHF Channel 16, to reduce misidentification risk.

Electronic interference continues to present a credible concern. The operating environment requires heightened situational awareness throughout all approaches.

5D. Arabian Sea (No change)

No significant change in the operating environment. The regional posture remains stable, with no confirmed maritime attacks reported. Residual risk persists due to broader regional tensions; an attack is possible but not likely, and current indicators do not suggest any shift toward increased threat levels in the near term.

5E. Gulf of Aden (No change)

The threat of hostile small-craft activity remains elevated, with intermittent skiff presence still assessed as possible in the wider area despite the seasonal monsoon. Small-craft groups retain the capability to conduct aggressive close-approach behaviour, underscoring the need for sustained vigilance throughout the IRTC and adjacent coastal zones.

The operating environment continues to support opportunistic movement in coastal and sheltered areas, particularly within established small-craft operating zones. Southwest monsoon conditions remain firmly established, with coastal waters offering favorable conditions for small-boat activity. Fresh to strong easterly winds and 2.0–3.0 m seas in open waters further degrade offshore conditions, narrowing operating windows for extended-range skiff activity. Skiff mobility remains possible nearshore, while offshore operations are increasingly constrained.

5F. Southern Red Sea / Bab el Mandeb (No change)

Houthi messaging remains elevated, including the formal 20 July declaration of a maritime blockade targeting Saudi-linked vessels. The scope of the announcement remains selective, but the recent attack on a tanker — and subsequent Houthi strikes on Saudi oil facilities along the Red Sea coast — demonstrate both intent and capability to target Saudi-affiliated assets. This marks a clear shift from rhetoric to operational employment.

In the near term, commercial routing for non-Saudi-linked vessels is expected to continue through established lanes, though operators may adopt heightened caution and adjust speed, timing, or onboard posture. A reduction in traffic involving Saudi port calls or vessels perceived as Saudi-linked is possible as operators reassess exposure. Broader commercial flows may show moderate short-term variability as companies evaluate alternative routing options.

The environment remains dynamic, and vessels should anticipate closer monitoring and potential short-notice navigational adjustments. GNSS interference is expected to persist as a residual hazard, with periodic effects extending from the central Red Sea into the southern sector.

For general commercial traffic, no coordinated or imminent hostile action is indicated, though within the broader threat picture additional attacks are assessed as a strong possibility.

5G. Somali Coast and Somali Basin (No change)

PAG activity remains possible across the Somali Coast and Somali Basin, with overall likelihood assessed as MODERATE. Southwest monsoon conditions continue to degrade offshore environments, with 2.0–3.0 m seas and moderate to strong so restricting extended-range skiff operations.

Despite monsoon onset, coastal waters remain comparatively sheltered, sustaining residual opportunistic piracy risk in nearshore areas where small-boat activity remains feasible.

5H. Northern Red Sea / Suez (No change)

The environment remains stable with no indicators of maritime escalation. Periodic EMI and GNSS disruptions are likely to continue.

5J. Eastern Mediterranean

On July 29th, 2026, Egypt's cabinet confirmed drone strikes occurred at Egypt's Damietta port (Mediterranean coast, near Suez approaches). The attack struck the floating storage and regasification unit (FSRU) Energos Winter; fire spread and also affected the nearby LNG carrier GasLog Salem. Fires were extinguished, no casualties reported, vessels were moved offshore, and the wider port continued limited operations. No group claimed responsibility. This incident is the subject of the referenced UKMTO advisories 099-26 and 100-26 for serialization purposes but will not be published as they fall outside the UKMTO geographic VRA.

The operating environment in the wider Eastern Mediterranean remains otherwise stable, with the baseline threat level previously assessed as LOW. Periodic electronic and navigational interference may still be encountered near Cyprus and the Levant. Naval presence remains, and vessels should maintain prudent separation from military units. The Damietta event introduces a new, confirmed kinetic risk to energy shipping and port infrastructure in Egyptian Mediterranean waters, which might raise concerns about potential spillover closer to the Suez Canal approaches.

Industry Guidance for Safe Management of Vessel Transit through the Strait of Hormuz:

UKMTO transits

UKMTO Strait of Hormuz – Latest incidents

UKMTO VRA AIS Anomalies

Confirmed Maritime Security Incidents List since 28 February

Date	Vessel	Vessel Type	Event Type	Location	Summary
01 Mar 2026 - UKMTO 004-36	SKYLIGHT	Tanker	Attack	Strait of Hormuz	Vessel struck by projectile while at anchor causing fire; crew evacuated with injuries reported.
01 Mar 2026 - UKMTO 006-36 UKMTO 005-26	HERCULES STAR	Tanker	Attack (serious)	Strait of Hormuz	Vessel struck by projectile while transiting outbound; fire reported onboard.
01 Mar 2026 - UKMTO 006-26	OCEAN ELECTRA	Bulk	Attack (serious)	Arabian Gulf	Projectile detonated in close proximity while vessel was transiting westbound; no damage reported.
01 Mar 2026 - UKMTO 007-36	MKD VYOM	Tanker	Attack (serious)	Gulf of Oman	Vessel struck by projectile (USV) while transiting northbound causing fire; one fatality reported.
01 Mar 2026 - UKMTO 008-26	STENA IMPERATIVE	Tanker	Attack (serious)	Bahrain	Vessel struck by two projectiles while in drydock causing fire and damage.
03 Mar 2026 - UKMTO 009-26	PELAGIA	Bulk	Near Miss	Gulf of Oman	UAV observed near vessel before impacting water nearby; no damage reported.
03 Mar 2026 - UKMTO 010-26	GOLD OAK	Bulk	Attack (serious)	Gulf of Oman	Vessel struck by projectile while at anchor causing structural damage; crew safe.
03 Mar 2026 - UKMTO 011-26	LIBRA TRADER	Tanker	Attack (serious)	Gulf of Oman	Vessel struck by projectile while anchored; damage reported.
04 Mar 2026 - UKMTO 012-26	SAFEEN PRESTIGE	Container	Attack (serious)	Strait of Hormuz	Explosion was reported near stern following approach by small craft; crew abandoned vessel.
04 Mar 2026 - UKMTO 013-26	MSC GRACE	Container	Near Miss (serious)	Arabian Gulf	Projectile detonated approximately 1 NM from vessel while drifting.
06 Mar 2026 - UKMTO 015-26	MUSSAFAH 2	Tug	Attack (serious)	Strait of Hormuz	Vessel struck by projectiles while supporting operations with SAFEEN PRESTIGE.
07 Mar 2026 - UKMTO 016-26	ARABIA III	Offshore Rig	Attack (serious)	Arabian Gulf	Drilling rig struck by UAV causing injuries and evacuation of personnel.
10 Mar 2026 - UKMTO 017-26	GH KAHLO	Bulk	Near Miss	Arabian Gulf	The Master reports witnessing a splash and hearing a loud bang in proximity of a bulk carrier.
10 Mar 2026 - UKMTO 018-26	ONE MAJESTY	Container	Attack (serious)	Arabian Gulf	Vessel struck by projectile at stern causing possible structural damage.
11 Mar 2026 - UKMTO 020-26	STAR GWYNETH	Bulk Carrier	Attack (serious)	Arabian Gulf	Projectile strike caused breach in cargo hold and adjacent ballast tanks resulting in listing.
11 Mar 2026 - UKMTO 021-26	SAFESEA VISHNU	Tanker	Attack (serious)	Northern Arabian Gulf (STS area)	Struck by projectile while conducting STS operations; fire onboard and casualty reported.
11 Mar 2026 - UKMTO 021-26	ZEFYROS	Tanker	Attack (serious)	Northern Arabian Gulf (STS area)	Struck by projectile during STS operations causing significant fire.
12 Mar 2026 - UKMTO 022-26	SOURCE BLESSING	Container	Attack	Arabian Gulf (North of Jebel Ali)	Projectile struck accommodation block causing fire; crew safe.

17 Mar 2026 - UKMTO 023-26	Name withheld UFN	LPG Carrier	Suspicious activity	Approx 23 NM of the coast of UAE	Vessel was subjected to falling debris from drone or Missile Interception minor structural damage, no fire; crew safe.
18/03/2026 - UKMTO 024-26	Name withheld UFN	Chemical products tanker	Attack	Vessel in TTW of UAE, 11NM off the coast	Hit by unknown projectile and caught fire. Crew of 16, 15 rescued and one crew member unaccounted for.
19/03/2026 UKMTO 025-26	Name withheld UFN	Tug, Multipurp ose Offshore vessel	Suspicious activity	Inner anchorage at Ras Laffan Port, approx 4 NM out.	Debris from a drone impacted on board, resulting in damage to the bridge window. No injuries to personnel and no structural damage to the vessel have been reported.
21/03/2026 UKMTO 026-26	Name withheld UFN	Bulk carrier	Suspicious activity	Arabian Gulf, approx 12 NM from the coast of UAE.	Vessel crew heard an explosion and observed a fire for a short period approx 1300 meters from vessel, crew of 24 safe.
30/03/2026 UKMTO 028-26	EXPRESS ROME	Container	Suspicious activity	Transiting eastbound via the Arabian Gulf, 22NM from Saudi Arabia	2 missiles splash into the water approximately 50 – 100 meters on the starboard side of the vessel. No damage and all crew are safe
30/03/2026 UKMTO 029-26	AI SALMI	Crude oil Tanker	Suspicious activity	Stationary, 31NM from the coast of UAE, Arabian Gulf.	Vessel was hit by an unknown projectile. There was a fire located in the STBD side cargo tank, fire was extinguished. Crew safe.
31/03/2026 UKMTO 030-26	AQUA 1	Tanker	Suspicious activity	Stationary 12NM from the coast of Qatar.	Vessel was hit by 2 unknown projectiles. As a result, a small fire started but was extinguished. Crew safe.
05/04/2026 UKMTO 031-26	Name withheld UFN	Container	Suspicious activity	Alongside in Khorfakkan port, UAE	Three unknown projectiles impacted in proximity, no damage. Crew safe.
07/04/2026 UKMTO 032-26	Name withheld UFN	Container	Attack	In transit westbound Arabian Gulf, 25 NM off the cost of Iran.	The vessel was struck by an unknown projectile causing damage above the waterline. The crew are safe.
07/04/2026 UKMTO 036-26	Name withheld UFN	Bulk Carrier	Attack	112nm SE of Ras-al-Hadd	The vessel was struck by 2 unknown projectiles resulting in a fire. The crew is safe.
18/04/2026 UKMTO 037-26	Name withheld UFN	Tanker	Attack	20NM NE of Oman	The vessel being approached by 2 IRGC gun boats, no VHF challenge that then fired upon the tanker. Tanker and crew are reported safe.
18/04/2026 UKMTO 038-26	Name withheld UFN	Container	Attack	25NM NE of Oman	A report of a vessel being hit by an unknown projectile which caused damage to some of the containers, no fires or environment impact reported
18/04/2026 UKMTO 039-26	Name withheld UFN	Unspecifie d	Suspicious activity	3NM E of Oman	The Master reported sighting a splash in close proximity of the vessel.

20/04/2026 UKMTO 040-26	Name withheld UFN	Unspecified	Suspicious activity	Strait of Hormuz	Vessel experienced aggressive hailing and threats by IRGC during transit of the Strait of Hormuz. Vessel proceeded unharmed.
22/04/2026 UKMTO 041-26	Name withheld UFN	Container	Attack	15NM from the coast of Oman	A container vessel was attack by 1 small craft with 3persons onboard. The bridge heavily damaged by RPG and small arms fire. The Master was informed he has permission to transit the Strait of Hormuz. AIS was off. No VHF warning prior to the attack. Crew are reported safe and well.
22/04/2026 UKMTO 042-26	Name withheld UFN	Container	Attack	6NM west of Iran	The vessel was transiting southbound through the Strait of Hormuz. The vessel was fired at and VHF hailed by the IRGC to drop anchor.
22/04/2026 UKMTO 043-26	Name withheld UFN	Cargo	Attack	8NM west of Iran	An outbound cargo ship reported been fired upon and then stopped in the water. Crew are safe and accounted for. There is no reported damage to the vessel.
03/05/2026 UKMTO 050-26	Name withheld UFN	Bulk Carrier	Attack	11NM west of Sirik, Iran	The Master of a northbound bulk carrier has reported being attacked by multiple small craft. All crew reported safe and no environmental impact reported.
03/05/2026 UKMTO 052-26	Name withheld UFN	Tanker	Attack	78NM of coast of UAE	Vessel attacked by possible drones in the engine room and cargo hold. All crew reported safe and no environmental impact reported.
04/05/2026 UKMTO 053-26	Name withheld UFN	Cargo Vessel	Suspicious Activity	36NM N of Dubai	Fire reported in engine room. Cause unknown. Authorities investigating. All crew reported safe and no environmental impact reported.
04/05/2026 UKMTO 054-26	Name withheld UFN	Tanker	Attack	40NM off the coast of UAE	Fire reported on deck, a result of attack. Ballast and cargo tank damage reported. All crew reported safe.
05/05/2026 UKMTO 055-26	Name withheld UFN	Cargo Vessel	Attack	Strait of Hormuz, IVO the coast of Oman	The vessel has reportedly been hit by an unknown projectile while transiting out of the Straits of Hormuz. 4 of the crew have been injured and 1 crew member is severely injured. Later 8 crew were flown to hospital.
10/05/2026 UKMTO 056-26	Name withheld UFN	Bulk Carrier	Attack	23NM northeast of DOHA, QATAR	The Master of a Bulk Carrier reports being hit by an unknown projectile. A small fire was extinguished; there are no casualties or environmental impact.
14/05/2026 UKMTO 057-26	Name withheld UFN	Fishery Research	Suspicious Activity	38NM northeast of Fujairah, United Arab Emirates.	The CSO reported that the vessel has been taken by unauthorized personnel whist at anchor, now bound for Iranian Territorial Waters
14/05/2026 UKMTO 058-26	Name withheld UFN	Livestock Carrier	Suspicious Activity	IVO Limah, Oman	Livestock carrier suffered an explosion and subsequently sank. All 14-crew recovered by Omani authorities.

22/05/2026 UKMTO 059-26	Name withheld UFN	Tanker	Suspicious Activity	98NM north of Socotra	The CSO of a tanker has confirmed that the vessel was approached by a small craft with five persons onboard. The vessels Armed Security Team fired warning shots at the small craft which forced them to alter course.
23/05/2026 UKMTO 060-26	Name withheld UFN	Product tanker	Suspicious Activity	200NM west of Socotra	The vessel was approached by a small craft with 5 persons onboard, closest point of approach 100m. The vessel's Armed Security Team were deployed and the small craft altered course away from the reporting vessel.
26/05/2026 UKMTO 062-26	Name withheld UFN	Tanker	Attack	60NM east of Muscat, Oman	The Master of a Tanker reports of an external explosion, Port side aft close to the waterline. The crew and vessel are safe, although the Master reports some bunker fuel has discharged into the sea.
01/06/2026 UKMTO 063-26	Name withheld UFN	Cargo Vessel	Attack	40NM southeast of Umm Qasr, Iraq	A Cargo Vessel was transiting in the Arabian Gulf when it experienced a large explosion following potential impact from an unknown projectile on the starboard side.
08/06/2026 UKMTO 064-26	Marivex	Tanker	Suspicious Activity	15NM northeast of Masirah, Oman	A tanker has experienced a fire onboard resulting in the evacuation of crew. Omani and Indian Authorities are coordinating the response. There are no reports of environmental impact at present.
10/06/2026 UKMTO 065-26	Name withheld UFN	Cargo vessel	Attack	88NM southwest of Balhaf, Yemen.	A cargo vessel has reported being approached by one craft with 6-armed persons onboard. There was an exchange of fire between the small craft and the cargo vessel's Armed Security Team resulting in the small craft turning away.
